WHY CHOOSE IR?

Our glass railings are crafted to meet the highest standards of quality, offering an unparalleled variety of sizes. With approximately four times as many standard size options as our competitors, we ensure a perfect fit for any space.

In addition to superior flexibility, we pride ourselves on providing cost-effective solutions without compromising on beauty. Our products are not only more affordable, but they also elevate the aesthetics of any environment, making them a superior choice for discerning homeowners and builders.

Discover the perfect blend of affordability, elegance, and customization with our exceptional glass railings.

At IR ,we are tested and proven by the harsh Canadian winters. Our products are not just enduring; they embody a tradition of excellence.

OUR MAIN PRODUCT

Matte Black

Brushed Stainless

WHY IR SPIGOTS?

IR Spigots are the heaviest and strongest in the industry. Each pair can support a glass span of up to 6 feet, thanks to their construction from marine- grade stainless steel.

This robust material underpins our ironclad warranty, guaranteeing unmatched quality. Each spigot weighs 5 lbs, with the black models featuring a durable, powder-coated finish for long-lasting elegance.

OUR 12MM GLASS

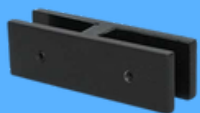

Certified Excellence: Compliant with CAN/CGSB 12.1-2017 & ANSI Z97.1-2015, certified by SGCC®.

Enhanced Safety: Edges are rounded to enhance security and prevent accidents.

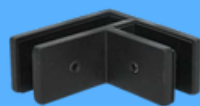

Code Standard Compliance: All glass panels are 12mm thick, meeting rigorous code standards.

GLASS CONNECTORS

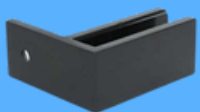

MIDDLE CONNECTOR

Connects two glass in a 180 degree angle

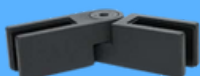

CORNER CONNECTOR

Strengthen the corner of a glass line, connecting at a 90 degree angle

WALL CONNECTOR

Connects the railing to the wall or a post

ADJUSTABLE CONNECTOR

Connect two glass that have an angle between them

SIDE MOUNT

Side mount spigots provide a sleek alternative to traditional spigots, perfect for those seeking an unobstructed view without visible hardware in their railing. They meet all code requirements, are easy to install, and deliver a luxurious aesthetic.

HINGES

The adjustable spring in these hinges facilitates a self-closing mechanism. A Wall/Post Hinge option is also available.

GATE LATCH

The integrated magnet in the latch ensures the door remains securely closed. Various models are available to suit different needs.

FLOOR LOCK

This floor lock enables the door to remain securely open or closed. It is essential for double gates.

SELF CLOSING GATE

Our revolutionary self-closing gate offers seamless integration with your home's aesthetics, requiring no posts and providing near-complete transparency. It's the ideal choice for securing decks or pools while maintaining uninterrupted views and design continuity.

This gate features a self-closing mechanism for added convenience and safety, ensuring your space is both secure and visually appealing.
